Constellations tap into the energy field of our families revealing some of the conscious and unconscious loyalties and patterns that were created out of love and a longing to belong. By witnessing a constellation unfold, you can begin to see and feel your family in a new way enabling you to move more comfortably into your own life.

Facilitated by: Molly Salans, LICSW, LMFT, is a holistic psychotherapist who has worked with groups, families, and individuals for more than 20 years. www.MollySalans.com
